

Considerable avalanche danger will be encountered in some regions

Edition: 8.3.2018, 08:00 / Next update: 8.3.2018, 17:00

Avalanche danger

region E

Level 2, moderate

Snow drifts

Avalanche prone locations

Danger description

The more recent snow drift accumulations are mostly small but in some cases prone to triggering. They are to be evaluated with care and prudence in particular in very steep terrain. Apart from the danger of being buried, restraint should be exercised in particular in view of the danger of avalanches sweeping people along and giving rise to falls.
