

# Considerable avalanche danger will be encountered in some regions

Edition: 8.3.2018, 17:00 / Next update: 9.3.2018, 08:00

## Avalanche danger

**region D** **Level 2, moderate**

### Snow drifts, old snow

#### Avalanche prone locations

#### Danger description

The more recent snow drift accumulations are mostly small but prone to triggering. Deeper layers of the snowpack can be released in isolated cases and mostly by large additional loads. Backcountry touring and other off-piste activities call for careful route selection.

**Danger levels**
