

Considerable avalanche danger will be encountered in some regions

Edition: 9.3.2018, 17:00 / Next update: 10.3.2018, 08:00

Avalanche danger

region D

Level 2, moderate

Snow drifts, old snow

Avalanche prone locations

Danger description

As a consequence of the sometimes strong wind further snow drift accumulations will form, in particular at elevated altitudes. Deeper layers of the snowpack can be released in isolated cases and mostly by large additional loads. Backcountry touring and other off-piste activities call for careful route selection.

Full-depth avalanches, Wet avalanches as day progresses

As a consequence of warming during the day individual full-depth and wet avalanches are to be expected.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
