

# Considerable avalanche danger will be encountered in some regions

Edition: 12.3.2018, 08:00 / Next update: 12.3.2018, 17:00

## Avalanche danger

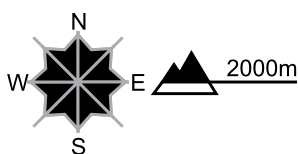

**region A**

**Level 3, considerable**

### Fresh snow and snow drifts, old snow

#### Avalanche prone locations

#### Danger description

The fresh snow and snow drift accumulations are lying on the unfavourable surface of an old snowpack in particular on steep shady slopes. Even single winter sport participants can release avalanches, including dangerously large ones. Individual natural avalanches are to be expected. Snow sport activities outside marked and open pistes call for experience in the assessment of avalanche danger and caution.

### Full-depth avalanches

Below approximately 2400 m individual full-depth avalanches are possible.

**Danger levels**

1 low

2 moderate

3 consider.

4 high

5 very high
