

In the west and in the south a considerable avalanche danger will prevail

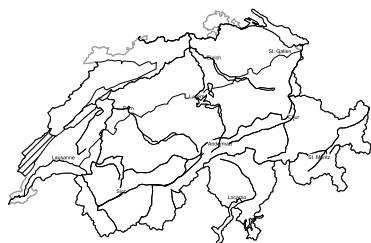

Edition: 13.3.2018, 08:00 / Next update: 13.3.2018, 17:00

Avalanche danger

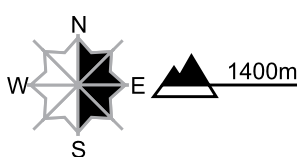

region F

Level 2, moderate

Snow drifts

Avalanche prone locations

Danger description

The more recent snow drift accumulations are mostly small but can in some cases be released easily. These will form in particular in gullies and bowls, and behind abrupt changes in the terrain. They are to be bypassed in particular in very steep terrain.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
