

Considerable avalanche danger will be encountered over a wide area

Edition: 13.3.2018, 17:00 / Next update: 14.3.2018, 08:00

Avalanche danger

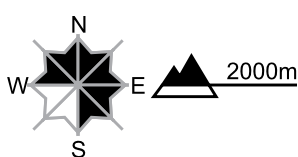

region E

Level 2, moderate

Snow drifts, old snow

Avalanche prone locations

Danger description

Fresh snow drift accumulations are mostly small and in some cases prone to triggering. The older snow drift accumulations can especially at their margins be released by people. Careful route selection is recommended.

Wet avalanches as day progresses

On steep sunny slopes wet snow slides and avalanches are possible.
