

# Considerable avalanche danger will be encountered over a wide area

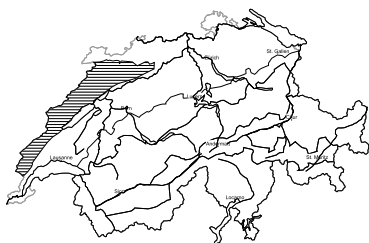

Edition: 15.3.2018, 08:00 / Next update: 15.3.2018, 17:00

## Avalanche danger

region F

Level 1, low

### Snow drifts, wet avalanches

The more recent snow drift accumulations are small but in some cases prone to triggering. They are to be evaluated with care and prudence in particular in terrain where there is a danger of falling.

As a consequence of the rain wet snow slides are possible.
