

Considerable avalanche danger will be encountered over a wide area

Edition: 17.3.2018, 08:00 / Next update: 17.3.2018, 17:00

Avalanche danger

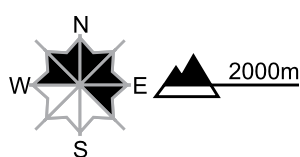

region D

Level 2, moderate

Snow drifts

Avalanche prone locations

Danger description

The somewhat older snow drift accumulations are mostly small but in some cases prone to triggering. They can especially at their margins be released by people. Careful route selection is recommended.

Full-depth avalanches

Individual full-depth avalanches and snow slides are possible. Caution is to be exercised in areas with glide cracks.
