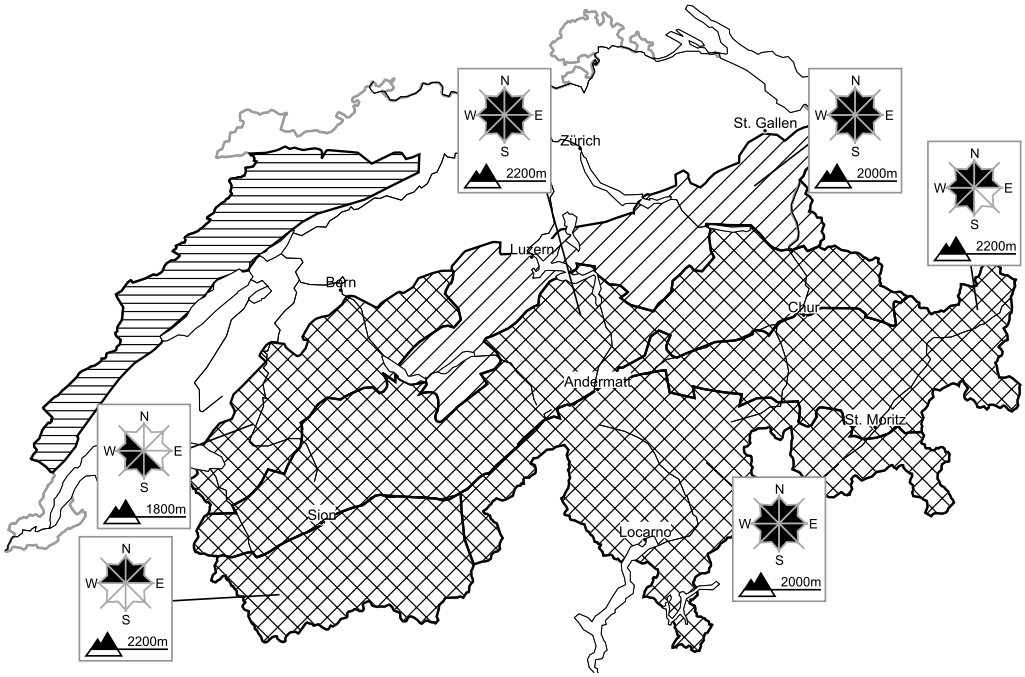
Avalanche bulletin for Wednesday, 21 March 2018

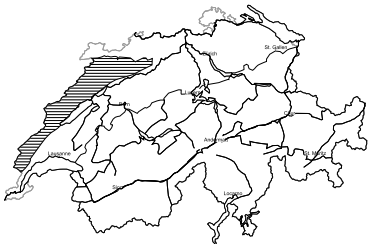
Considerable avalanche danger will be encountered over a wide area. Fresh snow drifts require caution

Edition: 21.3.2018, 08:00 / Next update: 21.3.2018, 17:00

Avalanche danger



region G — Level 1, low



Snow drifts

As a consequence of the Bise wind small snow drift accumulations have formed. These are to be evaluated with care and prudence in extreme terrain. Restraint should be exercised because avalanches can sweep people along and give rise to falls.

Danger levels 1 low 2 moderate 3 consider. 4 high 5 very high
