

Considerable avalanche danger will be encountered in some regions. Snow drifts and weakly bonded old snow require caution

Edition: 22.3.2018, 08:00 / Next update: 22.3.2018, 17:00

Avalanche danger

region E **Level 3, considerable**

Snow drifts

Avalanche prone locations

Danger description

The Bise wind has transported the loosely bonded old snow. The sometimes large snow drift accumulations of the last few days can be released by a single winter sport participant in some cases. They are to be evaluated with care and prudence in steep terrain. Backcountry touring calls for experience in the assessment of avalanche danger.
