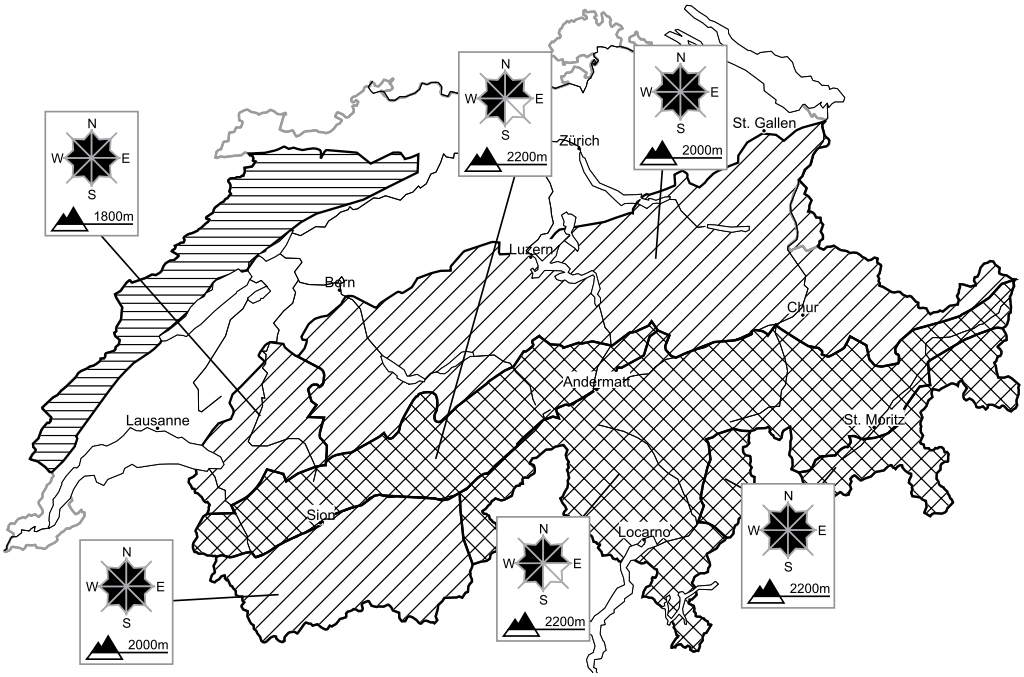
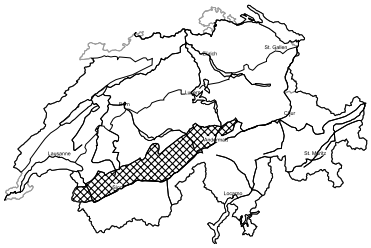
Considerable avalanche danger will be encountered in some regions

Edition: 22.3.2018, 17:00 / Next update: 23.3.2018, 08:00

Avalanche danger

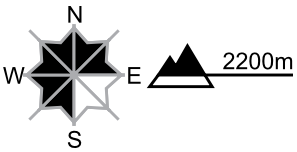


region C | **Level 3, considerable**



Snow drifts

Avalanche prone locations



Danger description

The somewhat older snow drift accumulations can in some cases be released easily especially at their margins. They are to be evaluated with care and prudence in steep terrain. The number and size of avalanche prone locations will increase with altitude.
