

Considerable avalanche danger will be encountered in some regions

Edition: 22.3.2018, 17:00 / Next update: 23.3.2018, 08:00

Avalanche danger

region C

Level 3, considerable

Snow drifts

Avalanche prone locations

Danger description

The somewhat older snow drift accumulations can in some cases be released easily especially at their margins. They are to be evaluated with care and prudence in steep terrain. The number and size of avalanche prone locations will increase with altitude.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
