

In the north and in the west a considerable avalanche danger will be encountered in some regions

Edition: 28.3.2018, 08:00 / Next update: 28.3.2018, 17:00

Avalanche danger

region E

Level 1, low

Dry avalanches

Individual avalanche prone locations are to be found in particular in extremely steep terrain. Apart from the danger of being buried, restraint should be exercised in particular in view of the danger of avalanches sweeping people along and giving rise to falls.

Full-depth avalanches

In all aspects small and, in isolated cases, medium-sized full-depth avalanches are possible.
