

Increase in danger of wet and full-depth avalanches as the day progresses

Edition: 5.4.2018, 17:00 / Next update: 6.4.2018, 08:00

Dry avalanches

Dry, region C

Level 2, moderate

Snow drifts

Avalanche prone locations

Danger description

The fresh and somewhat older snow drift accumulations are in some cases still prone to triggering. They can be released, especially at their margins,. Mostly avalanches are small. Backcountry touring calls for careful route selection.

Additional danger: Wet avalanches as day progresses (see 2nd map)
