Level 2, moderate

Wet avalanches as day progresses

As a consequence of warming during the day and solar radiation full-depth and wet avalanches are possible, including quite large ones. The avalanche prone locations are to be found in all aspects. Backcountry tours should be started early and concluded timely. Caution is to be exercised in areas with glide cracks.

Additional danger: Dry avalanches (see 1st map)

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
