

Full-depth and wet avalanches as the day progresses

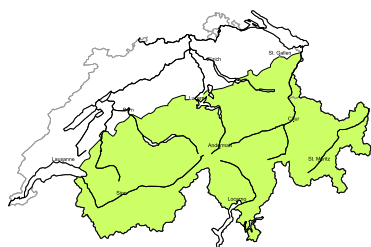

Edition: 22.4.2018, 17:00 / Next update: 23.4.2018, 17:00

Dry avalanches

Dry

Level 1, low

Individual avalanche prone locations for dry avalanches are to be found in particular in extremely steep terrain and adjacent to the ridge line. Caution is to be exercised in particular on north facing slopes in high Alpine regions. Restraint should be exercised because avalanches can sweep people along and give rise to falls.

Additional danger: Wet avalanches as day progresses (see 2nd map)

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
