

In some regions some fresh snow. Wet avalanches as the day progresses

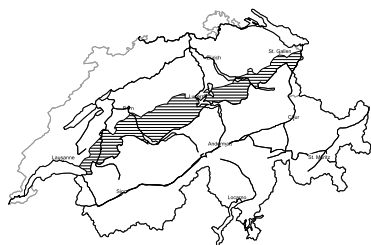

Edition: 25.4.2018, 17:00 / Next update: 26.4.2018, 17:00

Wet avalanches as day progresses

Wet, region C

Level 1, low

Wet avalanches as day progresses

Outgoing longwave radiation during the night will be severely restricted. In starting zones where no previous releases have taken place individual full-depth and wet avalanches are possible as the day progresses. The avalanche prone locations are to be found in particular in west to north to east facing aspects. Caution is to be exercised in areas with glide cracks.

Additional danger: Dry avalanches (see 1st map)

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
