

In the early morning a widespread favourable avalanche situation will prevail. Wet avalanches during the day

Edition: 27.4.2018, 17:00 / Next update: 28.4.2018, 17:00

Dry avalanches

Dry, region B

Level 1, low

Individual avalanche prone locations for dry avalanches are to be found on extremely steep north facing slopes, in particular in high Alpine regions.

Additional danger: Wet avalanches as day progresses (see 2nd map)
