

In Upper Valais a considerable avalanche danger will be encountered in some regions. Wet avalanches as the day progresses

Edition: 4.5.2018, 17:00 / Next update: 5.5.2018, 17:00

Dry avalanches

Dry, region C

Level 1, low

Individual avalanche prone locations for dry avalanches are to be found in particular in extremely steep terrain. In high Alpine regions avalanche prone locations are a little more prevalent. Apart from the danger of being buried, restraint should be exercised in particular in view of the danger of avalanches sweeping people along and giving rise to falls.

Additional danger: Wet avalanches as day progresses (see 2nd map)
